

Outdoor Storage Policy

Space at Hand endeavors to provide a clean, safe place to store vehicles. In order to maintain cleanliness standards, outside storage tenants must follow these policies:

1. Tenants must provide details of the vehicle or trailer typically stored in their outdoor storage space so that we can include those details on their account information.
2. Ownership is required.
3. Outdoor storage must be a vehicle or something on wheels. No sea cans or containers will be allowed.
4. At times, Space at Hand may require outdoor storage tenants to move their items in order to allow paving, grading and other maintenance. It is suggested that vehicles are in running order to facilitate this.
5. No items can be stacked outside of the vehicle on the ground; everything must be on or inside the vehicle/trailer.
6. No auto parts, wheels, bumpers etc. can be left around vehicles or dragging on the ground.
7. The complete vehicle (including tongue of trailer) must fit within the size of the rented space.
8. Please park in the center (width ways) of your outdoor space to be courteous to your parking neighbors.
9. No vehicles with oil/fuel leaks will be permitted as it is an environmental concern.
10. Park only in designated spots.
11. No repair or maintenance of vehicles in the parking compound.
12. All trailer jacks must have blocking or protection from creating holes in pavement or gravel.

Thank you for your cooperation,

Space at Hand
